

Finish

Items will be finished with an electrostatically applied thermo-set polyester powder coat. Prior to finishing, the parts are thoroughly cleaned using both abrasive and chemical methods. Several hundred non-stock colors and textures are available as well as custom color matching for existing projects.

Benefits of powder coating

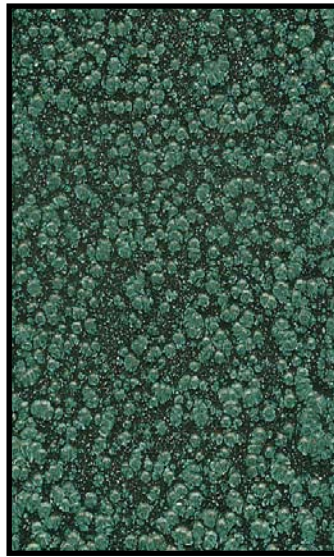

- Durable, long lasting, attractive finish
- Superior scratch resistance
- Environmentally friendly

Premium Finishes

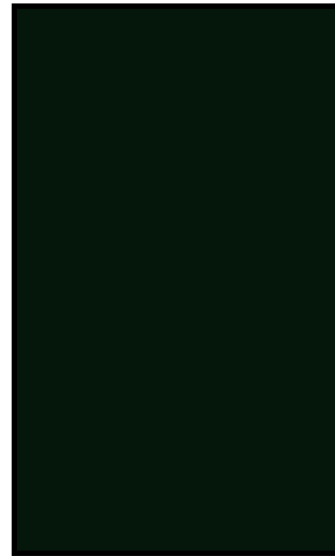

(adder will apply)

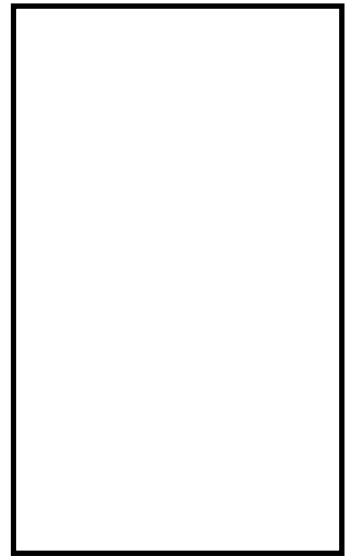

Antique Copper
(ATC)

Granite Green
(GTG)

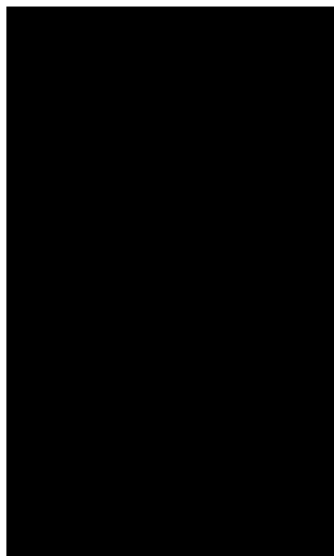

Green
(GRN)

White
(WHT)

Classic Bronze
(CLB)

Satin Black
(BLK)

Textured Black
(TBK)

We recommend Textured Black (TBK) as the finish of choice when specifying black as the color. The fine textured finish of TBK gives the appearance of a lower gloss level than BLK and is therefore more forgiving to minor surface imperfections and dirt (printed sample appears lighter than actual finish in order to illustrate texture).

All colors shown are approximate. Actual colors may vary slightly.
